Lab Report : 6

Lab Group: 2

Date: 26/09/2023

Think over the following questions:

- How would you represent testing of the application with multiple browsers?

→ To represent the testing of the application with multiple browsers, We need to use a fork so that both actions get executed and output is generated at the same time.

- Can generation of the patch file and update the Subversion repository be done concurrently?

→ No, We should generate the patch file before updating the Subversion repository

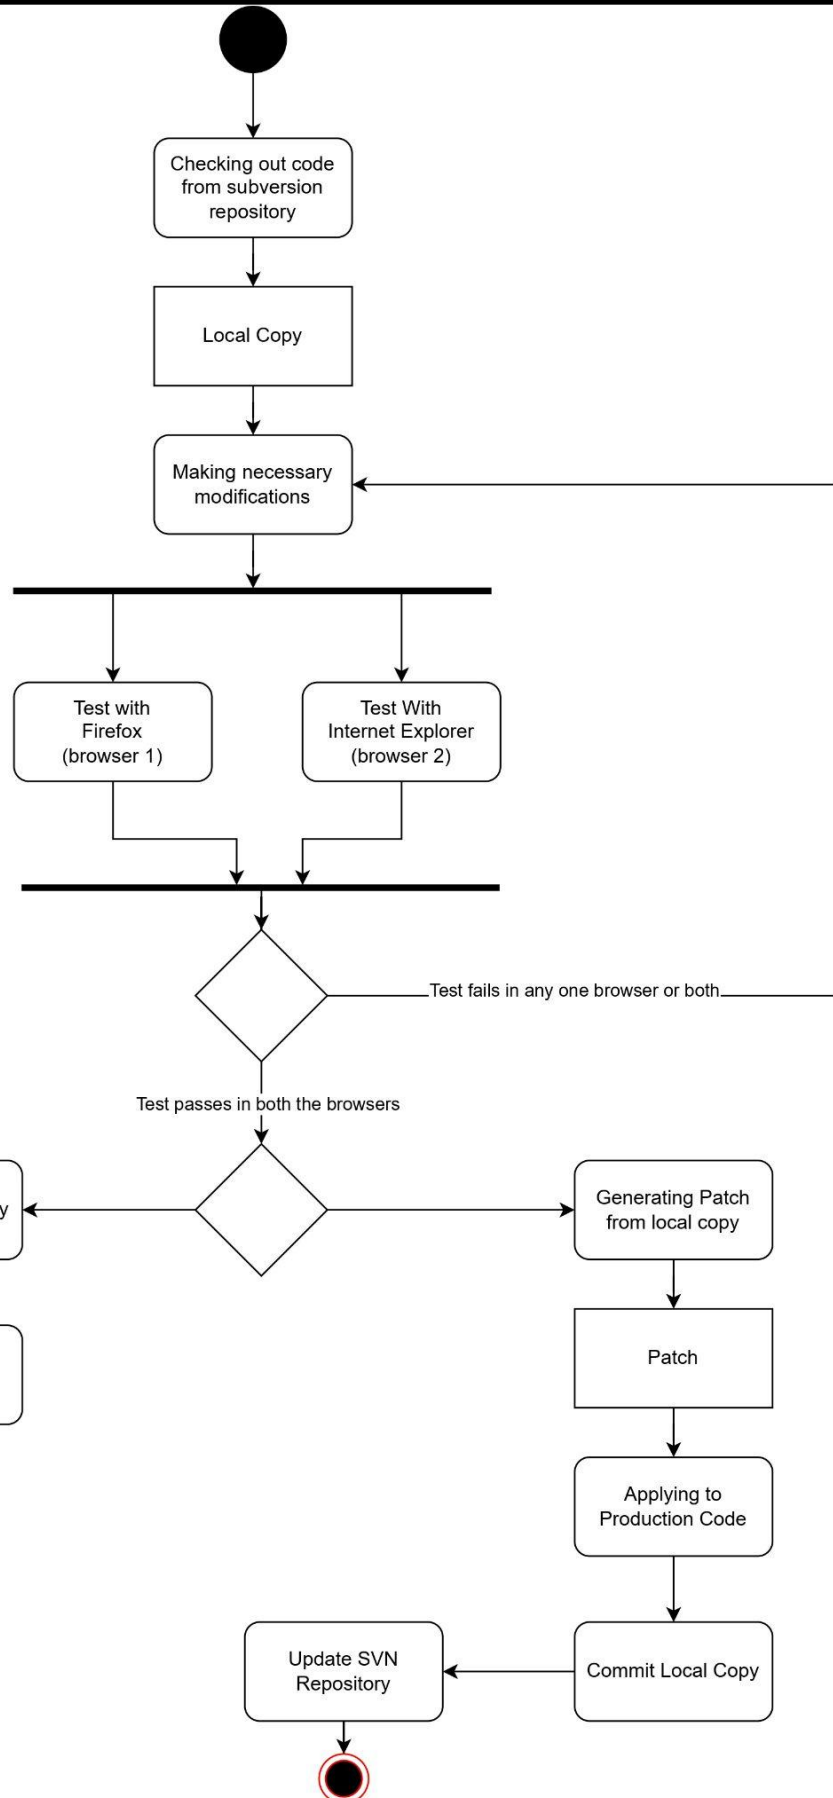

- Can patching the production code and updating the Subversion repository be done in parallel?

→ Yes, patching the production code and updating the SVN repository can be done in parallel.

Exercise:

1. Draw an activity diagram to graphically represent the following workflow.
2. Draw a class diagram for any one of the sprints by identifying objects, classes and their relationships.
→ Chosen sprint for class diagram: New User Registration
